PROFILE

Motivated self-learner seeking an internship position to support the Front-end development of your company. Passionate about design and user experience, a fast learner, and eager to gain practical experience in frontend development and expand my coding capabilities. Currently expanding skills in React to further enhance capabilities.

SKILLS

- Familiarity with HTML, CSS, and JavaScript
- Good understanding of web development principles and best practices
- Familiarity with frontend frameworks like React
- Passion for delivering exceptional user experiences
- Self-motivated and able to work independently
- Excellent communication and collaboration skills

PROJECTS

- I have successfully completed a series of small-scale coding projects aimed at honing my programming skills. These projects encompassed a diverse range of tasks, allowing me to acquire hands-on experience and reinforce my knowledge of various programming languages and methodologies. Through this dedicated practice, I have cultivated a deeper understanding of coding principles. The projects I have completed consist of "Rock, Paper, Scissors", "To-Do-List", "Drag and Drop", "Music Website", "Weather App" etc...

EDUCATION

UNIVERSITY DEGREE

Naval Academy

2013 - 2017

SELF-TAUGHT FRONTEND DEVELOPER

2021 -

EXPERIENCE

- While I may lack formal work experience, I have dedicated myself to undertaking a series of personal coding projects with the primary objective of improving my programming skills. Through these projects, I have gained valuable hands-on experience and deepened my understanding of coding principles. These initiatives have served as a platform for continuous learning and have allowed me to demonstrate my passion and commitment to the field of coding.
